To Our Customers

Exclusions to Marking Change Notice Issued on March 2022

Compliance with UKCA Marking

We would like to express our sincere gratitude for your continued support and promotion of our products.

The products listed below will be changed as described below.

Thank you for your understanding.

Best regards

Record

1. Target Models Series

LED Work Light : CLA□/CLE□/CLK□/CLN□/CWA□/CWK□

2. Reason for Exclusion

Products sold in the UK will need to comply with the UKCA marking from January 2023. Since the March 2022 announcement, we began working on the changes to display the UKCA mark on the target products. However, in August 2022, the UKCA marking standards partially changed, and since we are unable to confirm conformity to the new standards at this time, we will exclude certain products from the UKCA marking compliance.

3. Others

- (1) The March 2022 notice, titled "UKCA marking and WEEE Command compliant model implementation," can be found in the News section of the homepage as a PDF.
- (2) Models we cannot confirm compliance at this time will be excluded from the "UKCA WEEE Compliant Model List" PDF file, which is listed in the same news item along with the March 2022 notice.

END
